R. D. LITTLEFIELD,
J. H. DEEGAN,
D. R. COLE,

Selectmen of Greenwood.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee and Citizens of
the Town of Greenwood:

I herewith submit my report of the schools of this town:

The arrangements for the opening of the schools in
September were nearly completed when I assumed the
duties of Superintendent on July first.

The teachers had their contracts, fuel had been pur-
chased, and plans made for conveyance, and for major
repairs.

Due to the fact that there were only three pupils to at-
tend the Greenwood Center school, the Committee voted to
close this school and convey the children to Lockes Mills.
It is believed that this will prove an advantage to these
pupils in that they are making contacts with the other
children and that the incentive to work is greater than can
be had in a school of three or four pupils.

Greenwood is most fortunate in being able to obtain so
many efficient local teachers. The same teachers are in the
schools as last year, though there are a few changes from
last year in their placement, as seen by the statistics follow-
ing.

The common school registration has continued to de-
crease but the number of pupils attending high school is
now larger. There are twenty-six pupils registered in high
school and only three of these will be graduated in June.
With the expectation that eleven pupils will be graduated
from the grammar school, it is obvious that there must be

a greater appropriation for high school tuition. This tuition expenditure seems a heavy tax on the citizens of Greenwood, but the town should be proud to have so many boys and girls attending secondary schools.

In the matter of textbooks a new series of English books was purchased for all fifth and sixth grade classes. Many books of different subjects for the various grades were necessary to supplement those in use. New geographies were obtained for the outlying schools. Some reading material was purchased but more reading material is needed in all grades. New health books for the upper grades should replace those long since out-of-date. Dictionaries and reference books are needed.

The school buildings are in very good repair. The shingling has been done at the Richardson Hollow and Irish schools.

Conditions at the Lockes Mills building were such after the flood of last spring as to require the laying of a new cement floor in the basement and the repairing of the heat and water system.

There is still a problem in regard to the water supply at this building. Because of the low water supply from the well in periods of dry weather, the conditions of health and sanitation are questionable.

The second-hand material used in installing the heating plant at Lockes Mills may require a constant expenditure in excess of what should be expected to keep it in repair such a short time after its installation. It is probable that there will have to be a new main smoke pipe before another winter.

It is noted that the school buildings are not provided with flags as required by law. I suggest that the municipal officers make provisions for this in their appropriations as the expense for flags should not come out of the school funds. Fifteen dollars is recommended for this purpose.

In considering the school budget, there must be a substantial increase, due mainly to the larger number of pupils to be in high school and also to the fact that we are likely to receive common school tuition for only one pupil next year, while our expenditure for common school tuition will be about the same as that of the present year. The increase in teachers' wages this year must be maintained the coming year.

The fuel bill this year is greater than that of the previous year, but a shortage of both coal and wood last spring necessitated putting in an additional supply which had to be paid for from this year's appropriation. It was found that much heat was escaping in the basement because of leaks in the pipes. These pipes were repaired in the fall. It will be noted that the light bill is included in the fuel account, having been transferred from the supply account at the recommendation of the former Superintendent.

The committee is asking for less money for repairs; thus trying to offset somewhat the amount necessary for the high school funds.

The school nurse has examined all the children. It is hoped that all parents and citizens will cooperate, as many have already done, to correct the defects reported.

In closing this report, I wish to express my appreciation and gratitude to all those who have contributed in any way to make my work pleasant, and, I hope, profitable.

I would especially thank the Superintending School Committee and the teachers for their splendid spirit of co-operation and loyalty.

Respectfully submitted,

CARRIE M. WIGHT,

Superintendent of Schools.

SCHOOL REPORT

Following are statistics regarding the teachers for the present school year.
